📇 SUMMARY

A results-driven developer skilled in HTML, CSS and JAVASCRIPT to build and style websites, creating responsive, user-friendly, and visually appealing interfaces.

Also have experience as an IT Officer with expertise in networking protocols (TCP/IP, DNS, DHCP), system administration, and database management (MySQL). Skilled in troubleshooting, network security, and configuring routers and switches. Proficient in Microsoft Office, Google Suite, and operating systems. Strong problem-solving abilities with a keen eye for identifying and resolving technical issues. Adept at explaining complex technical concepts in simple terms to ensure smooth IT operations and user support.

💼 WORK EXPERIENCE

06/2025 – Present

FRONTEND DEVELOPER INTERN
M-R International (MRsoft)
I worked on enhancing user interface components using HTML, CSS, and modern frameworks to create visually appealing and responsive designs. In addition, I focused on optimizing site performance by improving load times and ensuring smooth user interactions across different devices and browsers. This experience strengthened my ability to build efficient, user-friendly web solutions.

04/2023 – 09/2023

IT OFFICER
Jireh Technologies Limited - Shell, Ogunu.
Supported the organization's IT infrastructure by securing systems, managing hardware and software installations, and resolving technical issues. Provided expert assistance for loan processing tools and financial systems, ensuring operational efficiency through proactive IT maintenance and staff training.

- Ensured the security, performance, and reliability of IT systems supporting agricultural loan processing.
- Installed, configured, and troubleshoot hardware and software to optimize system efficiency.
- Provided technical support to employees for loan applications and financial systems.
- Managed and maintained servers, workstations, and databases for seamless operations.
- Trained staff on loan processing tools and cybersecurity best practices, improving digital literacy.
- Provide technical training and support to users
- Respond to and resolve technical incidents and issues.
